## MAIN ACTIVE INGREDIENTS

### CAFFEINE

One of the most widely used active ingredients in cosmetics for its ability to prevent the accumulation of fat in cells and exert a lipolytic action. It is in fact able to promote the degradation of triglycerides present in adipocytes, causing a reduction in volume. It also has strong antioxidant properties.

### MIX OF VEGETABLE EXTRACTS

Draining and toning action: a blend of botanical extracts (Ginkgo Biloba, Green Tea, Ivy and Bitter Orange) with proven draining and stimulating actions on the microcirculation.

### CARNITINE

Naturally contained in the cells of our body, this substance intervenes in the cellular processes of energy production by promoting the burning of fats.

### THERMO-ACTIVE INGREDIENT

Synthesis agent with a warming effect.

## INSTRUCTIONS

It is recommended using it twice a week, for 4 hours per application, applying the patch as shown in the figures and as a complement to Lipolytic Cream. We recommend applying the Lipolytic Cream in the morning and the Body Patch in the evening.
