

RESET / BODY

.100 DETOXY

Give your skin new life.

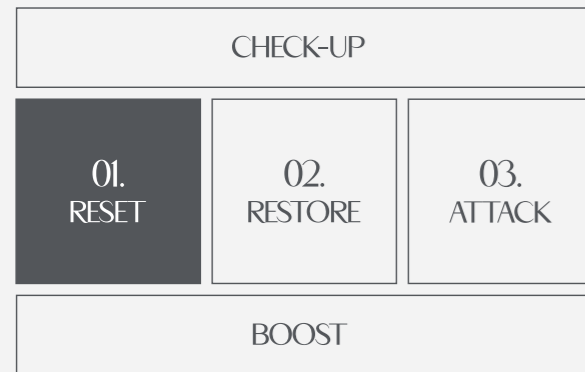

High Tech Total Body
treatment to detoxify
and oxygenate.

AROSHA
AESTHETIC SCIENCE

AROSHA METHOD

Discover our method

A professional, unique and distinctive method. Combining science and technology, Arosha has developed a THREE-PHASE strategy, applicable for face and body: RESET, RESTORE and ATTACK constantly supported by CHECK UP and BOOST for a synergistic and result-oriented action.

RESET

It is the first phase of the method, essential to detoxify and deep purify face and body and to prepare the skin to better absorb the functional substances of subsequent treatments.

TECHNOLOGICAL INNOVATION AND ACTIVE

CELL DETOXY SYSTEM

The latest powerful biological discovery for detoxification and longevity of skin cells.

WHAT IS IT

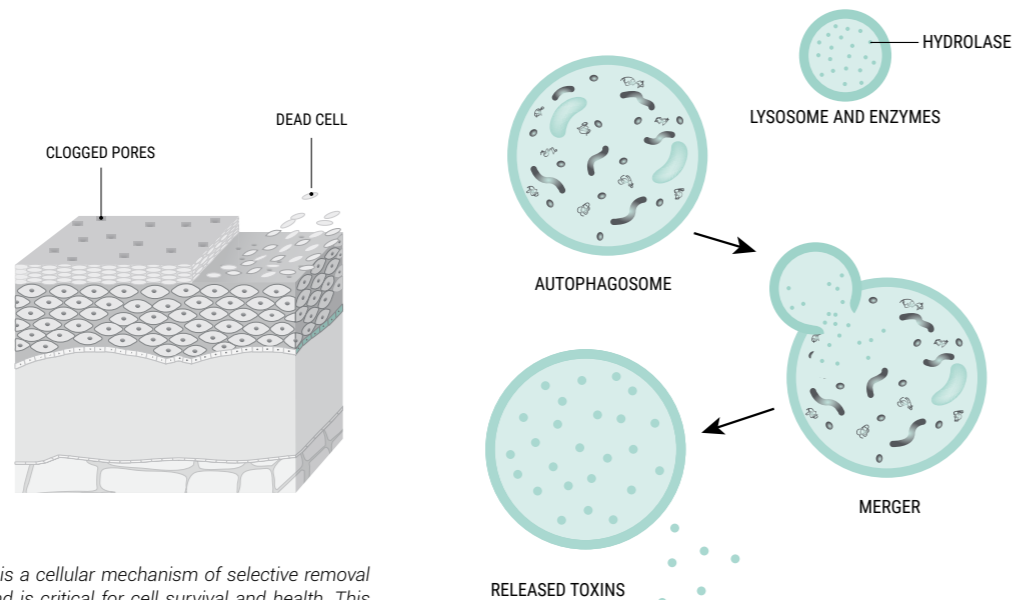

A purified active ingredient extracted from yeast, Candida Saitoana.

HOW IT WORKS

It stimulates autophagy*, the cellular detoxification system, freeing the cells from toxins that accumulate inside themselves and intoxicate them. In addition to strengthening the cellular detoxification process, CELL DETOXY SYSTEM improves the texture of the skin giving it a smooth and naturally radiant appearance.

ACTIONS

1. Improves the autophagic system
2. Strengthens the cellular detoxification process
3. Improves skin texture

*cellular autophagy or autophagocytosis is a cellular mechanism of selective removal of damaged cytoplasmic components and is critical for cell survival and health. This process ensures the disposal and recycling of waste within every living cell.

PHA

Polyhydroxy acids are gentle acids with sensitive skin and do not cause photosensitization.

WHAT THEY ARE

They are chemical exfoliants from the alpha hydroxy acid family (AHA). The most common are lactobionic acid and gluconolactone. Lactobionic acid comes from the oxidation of lactose. Like the other AHAs, it is effective in regulating the keratinization process, promoting skin renewal and cell renewal, improving the appearance of the skin and making it radiant and uniform. It is a very hygroscopic molecule and has a strong skin moisturizing property. It inhibits the development of free radicals, carrying out a significant antioxidant activity. In addition, it prevents and reduces damage related to sun exposure (photoaging) and reduces the melanin index of the skin, also exerting a slight lightening effect.

Gluconolactone is obtained by fermentation from renewable plant sources, starting from the glucose contained in them. It has a strong hygroscopic and long-term moisturizing power thanks to the presence of numerous hydroxyl groups. Applied to the skin, it promotes exfoliation and cell renewal, modulating the keratinization process. It has good antioxidant capabilities and is also able to restore the damaged skin barrier.

HOW THEY WORK

Acting exclusively on the surface, they do not disturb the deeper and more delicate layers, thus preventing irritation and not inducing the photosensitivity phenomenon.

ACTIONS

1. Exfoliate dead skin cells;
2. Help the active ingredients of the products to penetrate deeper increasing its effectiveness;
3. Even out the complexion;
4. Act against glycation, the process that occurs when digested sugar permanently attaches itself to collagen in the skin and weakens it.

PLUS

Thanks to the larger size of the molecules the PHAs penetrate only on the surface making them ideal for all skin types, especially the most sensitive ones.

Being larger molecules than alpha hydroxy acids, they penetrate the skin but to a smaller extent, slower and less deeply. They are more delicate exfoliants than glycolic acid and lactic acid, they do not burn and do not pinch (thanks to the slower absorption).

PAHs are the perfect alternative to AHAs, also ideal for dry skins because they are humectants, in fact they retain water molecules while exercising an active moisturizing function.

FERULIC ACID

This is a phytochemical substance present in the seeds and leaves of many plants (rice, oats, wheat) with exfoliating properties. Thanks to its particular chemical structure it has a high antioxidant power. In fact, it is able to reduce the negative effects of many external agents, such as cold, pollution, overly aggressive products, counteracting dryness, irritation and redness. In addition, it promotes the synthesis of collagen and elastin while maintaining the elasticity and natural firmness of the skin.

TREALOSE

This sugar is a very important cosmetic active ingredient, super moisturizing, which acts over time for a non-stop and lasting skin hydration. It also protects the skin from the most common pollutants and slows down the aging process.

VEGETABLE ESSENTIAL OILS

Compound of natural essential oils (Cinnamon, Ginger, Turmeric) able to increase lymphatic drainage at the dermo-hypodermic level and to activate blood circulation, distinguishing itself from common local hyperaemic agents and superficial vasodilators, which instead of stimulating the hemolymphatic circulation determine a stasis. In addition, it activates local microcirculation with a non-reddening thermographic effect.

THE KIT INCLUDES

RESET / BODY

SOFT PEELING GEL

DEEP PURIFICATION

Latest generation PHA-based acid pH peeling gel that performs a gentle exfoliation of the body. Also ideal for sensitive skin

ACTIVE INGREDIENTS

Polyhydroxy acids (PHA) and Ferulic Acid

Nr. 4 - Single-dose sachet 30 ml

OXYGEN ACTIVE GEL

STIMULATES AND REACTIVATES THE MICROCIRCULATION OF THE SKIN

Precious blend of essential oils in gel with a fresh and light texture that helps stimulate and reactivate skin microcirculation by re-oxygenating the tissues

ACTIVE INGREDIENTS

Trehalose and Essential Oils Mix of Cinnamon, Ginger and Turmeric

Nr. 4 - Single-dose sachet 50 ml

PURE DETOX

IMPROVES TISSUE OXYGENATION

Exclusive pre-soaked TOTAL BODY bandage in super-resistant, elastic and ultra-absorbent fabric with a powerful purifying action

ACTIVE INGREDIENTS

Cell Detox System

PLUS

BANDAGE made of SUPER RESISTANT, ELASTIC AND ULTRA ABSORBENT fabric

BANDAGE MAXI format (20 cm x 10 m) that allows a compressive wrapping action on the whole body including the breast

Nr. 2 - disposable bandages 300ml (20 cm x 10 m / each)

COMPLETE THE TREATMENT

RESET / BODY

DETOXY PLUS CREAM*

PURIFIES AND EVENS THE SKIN

Rich professional massage cream with purifying and detoxifying action

ACTIVE INGREDIENTS

Cell Detox System, Hyaluronic Acid, Trehalose, Shea Butter

Airless 500 ml

SUGARGEL SCRUB

PURIFIES AND EVENS THE SKIN

Innovative scrub with a surprising texture that combines the exfoliating properties of Sugar with the nourishing and emollient power of Avocado and Sweet Almond Oils and the freshness of a moisturizing milk.

Tube 200 ml - Retail product to use at home

BOOST / BODY

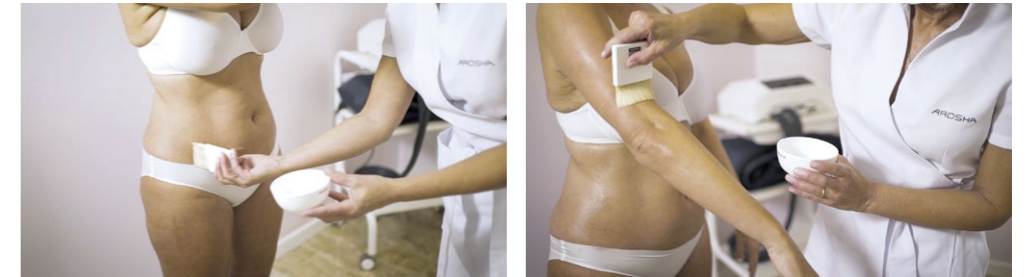

PROFESSIONAL TREATMENT

STEP 1

EXFOLIATION

Soft Peeling Gel

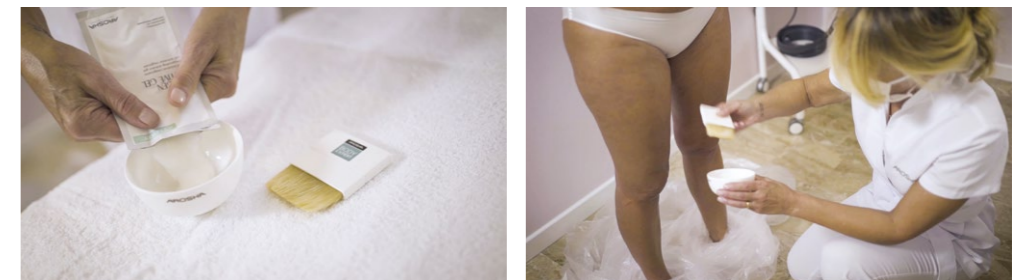

STEP 2

ACTIVATION

Oxygen Active Gel

STEP 3

SHOCK ACTION

Pure Detox

Maximize the effectiveness of the treatment with devices such as pressomassage and/or infrared

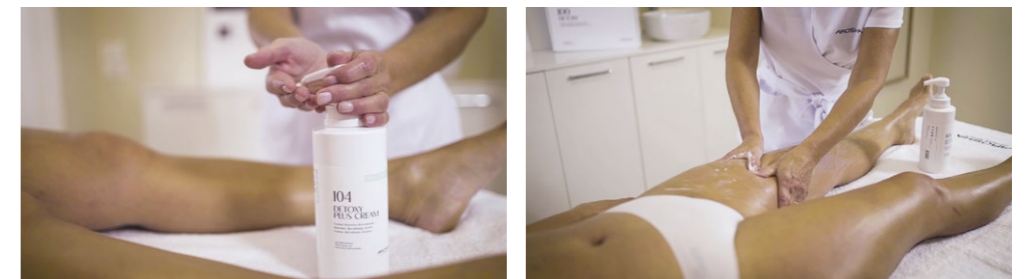

STEP 4

FINAL MASSAGE

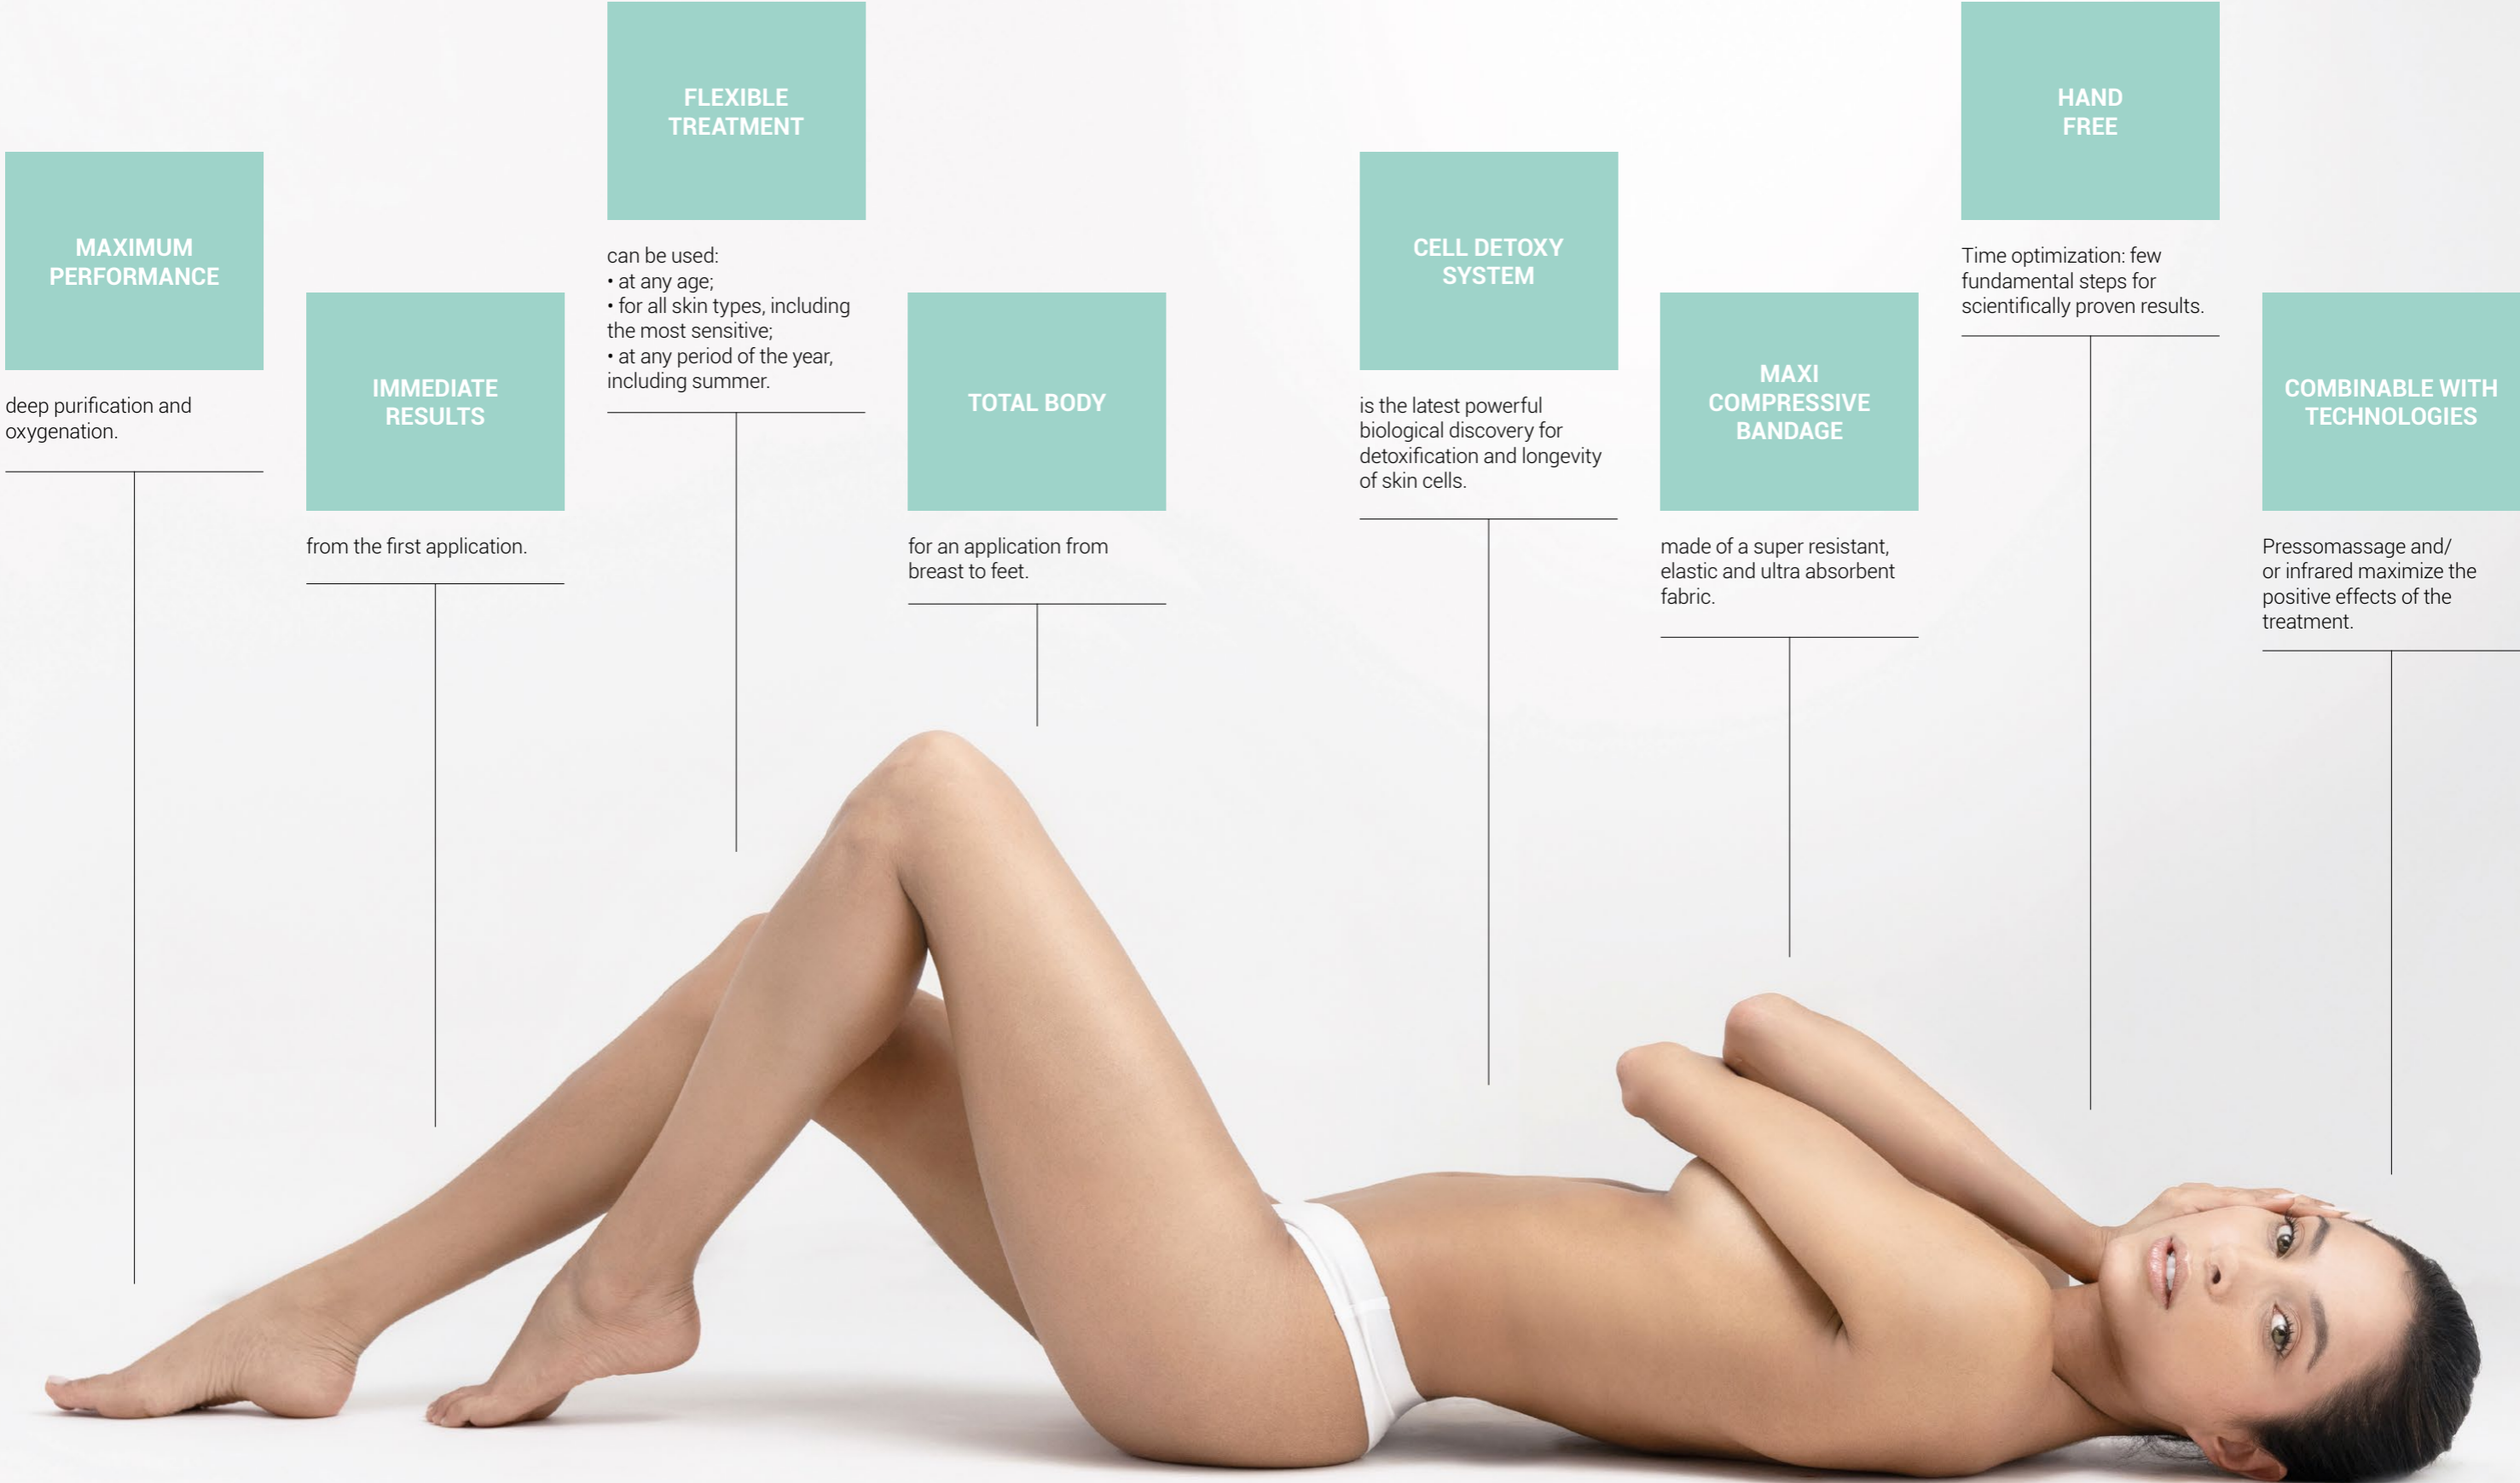

Detoxy Plus Cream

* Product not included in the kit
