MAIN ACTIVE INGREDIENTS

CAFFEINE

One of the most effective active ingredients in body treatments thanks to its lipolytic action. It is in fact able to promote the degradation of triglycerides in adipocytes by reducing their volume. It also has strong antioxidant properties.

CARNITINE

Naturally contained in the cells of our body, this substance intervenes in the cellular processes of energy production by promoting the burning of fats and

therefore their reduction.

PHOSPHATIDYLCHOLINE

Phospholipid used for the treatment of localized adiposity; it is able to dissolve fats by reducing the size of adipocytes.

WILLOW EXTRACT

Contains salicin (from which salicylic acid is derived), an anti-inflammatory and antibacterial ingredient. It is also rich in tannins, phenolic acids, flavonoids and various minerals, all of which help soothe the skin and promote cell regeneration.

IVY EXTRACT

Rich in saponins, it has a toning, draining action and stimulates the blood micro-circulation.

HORSE CHESTNUT EXTRACT

Helps fight the stagnation of liquids, increasing the permeability of capillaries; tones blood vessels and improves venous circulation, while at the same time carrying out an anti-inflammatory and decongestant action on the tissues. In addition, it has a diuretic action.
