MAIN ACTIVE INGREDIENTS

DERMOFIBRA®

Yarn linked to crystals through nanotechnologies, is capable of exerting a beneficial cosmetic action for the body. Once stimulated by body heat, the organic crystals in Dermofibra® reflect the bio-infrared rays that penetrate the skin

and subcutaneous tissue and interact with the water and organic compounds present in the tissue. The heat generated by the bio-infrared facilitates the relaxation of contracted muscles. The bio-infrared also stimulate microcirculation and metabolism thanks to their draining

action, improving the appearance of cellulite and reshaping the silhouette.

PURE RESISTEX SILVER (99.9%)

Special antibacterial fiber of which the gusset is made.

INSTRUCTIONS

Suitable for both day and night use, alone or under other clothing, even for sports. High quality yarn capable of maintaining its functions even after numerous washes.

Also available in packs of 9 pcs
