

BODYSLIM

Body in Bio-Infrared Dermofibra®

Body made of Dermofibra® Bio-Infrared yarn with a slimming and reshaping effect. It helps tone the abdomen area by stimulating microcirculation and giving an immediate shaping effect. The innovative Dermofibra® yarn was developed to stimulate microcirculation, improve skin hydration and facilitate the relaxation of contracted muscles.

PROBLEMS

- Localized adiposity

EFFECTS

- Slimming and remodeling
- Improvement of tone and microcirculation
- Reshaping of the silhouette

MAIN ACTIVE INGREDIENTS

DERMOFIBRA®

Yarn linked to crystals through nanotechnologies, is capable of exerting a beneficial cosmetic action for the body. Once stimulated by body heat, the organic crystals in Dermofibra® reflect the bio-infrared rays that penetrate the skin

and subcutaneous tissue and interact with the water and organic compounds present in the tissue. The heat generated by the bio-infrared facilitates the relaxation of contracted muscles. The bio-infrared also stimulate microcirculation and metabolism thanks to their draining

action, improving the appearance of cellulite and reshaping the silhouette.

PURE RESISTEX SILVER (99.9%)

Special antibacterial fiber of which the gusset is made.

INSTRUCTIONS

High quality yarn capable of maintaining its functions even after numerous washes. For more information see the package leaflet.

Also available in packs of 9 pcs
Cod. Art.: ARO131001

COMPOSITION: POLYESTER 57% / POLYAMIDE 32% / ELASTANE 11%.
