MAIN ACTIVE INGREDIENTS

DMAE

An active ingredient that stimulates the production of collagen by increasing the thickness of the epidermis and augmenting the water content in the stratum corneum. Hydrating effect. Prevents skin laxity.

CHONDRUS CRISPUS EXTRACT

A red alga rich in carrageen whose film-forming properties exert an action that is both protective against environmental stresses and moisturising. Prevents water loss and helps to convey the ingredients with which it is combined.

HYDROXYPROLINE & SILANOL

A compound molecule that combines the restructuring properties of organic silicon with the stimulus of the hydroxyproline collagen synthesis.
