MAIN ACTIVE INGREDIENTS

ORGANIC BIOCELLULOSE

Biocellulose forms the base of this innovative mask which, in addition to perfectly adapting and adhering to the skin, has technologically distinctive properties: **1.** Deeply transports the active ingredients with which it is imbued; **2.** Removes impurities from the skin.

ARGININE

Moisturising agent that supports the skin's barrier function. Carnosine: with

antioxidant and anti-ageing properties.

ACETYL GLYCYL BETA-ALANINE

Reduces hyperpigmentation by blocking the transport of melanin. Inhibits the activity of the enzymes responsible for melanogenesis (melanin production). Lightening agent.

GLYCOSYLATED HESPERIDIN

Thanks to its ability to stimulate blood microcirculation, it attenuates dark circles and strengthens the capillary walls.

Promotes the elimination of fluid stagnation in the eye area.

BETAINE/ALLANTOIN/ALOE BARBADENSIS

Reduce inflammation of the orbicularis area. Soothing effect.

AMINOBUTYRIC ACID (GABA)

Relaxes the muscles responsible for facial rippling.

INSTRUCTIONS

Each sachet contains two masks. Each mask is between 2 films. Once a mask is removed from the sachet, remove the outer film, apply the mask to the face then remove the second film. Repeat the same procedure with the second mask, applying it to the other eye. Ensure the masks adhere perfectly then leave them on for 20-30 minutes. Remove the mask and gently dab with the palm of the hands to facilitate the absorption of any residual serum.
