

HYALURONIC ACID

Pure Active

A water-free mixture with a high concentration of hyaluronic acid that performs an intense regenerating and redensifying action. It restores firmness and tonicity to the tissue and helps smooth the skin.

PROBLEMS

- Skin with a lack of hydration and elasticity
- Dry skin
- Marked skin

EFFECTS

- Moisturising
- Smoothing
- Regenerating
- Redensifying

50 ml tube

Cod. Art.: ARO205605

MAIN ACTIVE INGREDIENTS

HYALURONIC ACID

A fundamental constituent of the dermis with moisturising, elasticating and regenerating properties. It helps stimulate collagen synthesis and increases the proliferation of fibroblasts. Additionally, it prevents water loss from the skin's surface and activates re-epithelisation mechanisms by regulating the proliferation and migration of skin cells.

INSTRUCTIONS

Must-have for your daily beauty routine to create a personalised cosmetic in accordance with your needs. The paste should be mixed with body and face cream in order to maximise the moisturising effect. The possible presence of small lumps does not alter the quality of the product, being due to the particular type of hyaluronic acid; this form preserves the stability and activity of the acid until the moment when the product is mixed with the regular treatment. When mixing, the hyaluronic acid dissolves to render it available for absorption by the skin.

INGREDIENTS: PEG-8, PEG-90, HYDROLYZED HYALURONIC ACID.
