HOW TO USE

1. Cleanse the face, neck and décolleté with Arosha Cleansing Milk 101. Rinse.
2. Apply Arosha Tonic 102 with a cotton wool pad, gently patting over the face, neck and décolleté.
3. Proceed with the preliminary or regenerating cleansing in accordance with the session:
SESSION I (preliminary cleansing) >
 - a. Pour two-thirds of the Arosha Vitamin C vial into a small container before applying to the face using a brush. Facilitate absorption by repeatedly and gently pressing the palms of the hands onto the face until it is absorbed (wearing gloves is recommended).
 - b. Pour the rest of the Arosha Vitamin C vial into the container and add 4-5 measures of the Arosha Derma Peel. Use the brush to mix and apply to the face.
 - c. Repeatedly and gently press with the palms of the hands: 2-3 minutes for sensitive or delicate skin, 5 minutes for normal or oily skin. As time passes, the mixture will become sticky and create filaments between the skin of the face and the palms of the hands, with dead cells becoming trapped in these filaments. Microcirculation is stimulated thanks to this manual "pneumomassage", oxygenating the tissue and favouring the activity of subsequent treatments.
 - d. Rinse off thoroughly with lukewarm water.**SESSION II, III, IV (regenerating cleansing) >**
 - a. Apply 3-4 sprays of Arosha Glycolic Peel.
 - b. Pat gently with the palms of gloved hands for one minute.
 - c. Rinse off with water.
4. Shake the Active Charge well and gently apply to the face and neck.
5. Apply the Biocellulose mask as instructed, removing it after 20-30 minutes.
6. Finish the treatment by applying a layer of specific cream.
