

.152 PNEUMATIC PEEL

Massage peeling

Exfoliating gel based on latest generation polyhydroxy acids that help to delicately eliminate dead skin cells. Its innovative texture has been specially designed for the "pneumatic massage", a special treatment which, through actions of pressure and release of the skin, promotes the stimulation of the microcirculation and drainage, helping it to eliminate the toxins accumulated in excess. The result will be a deeply purified, renewed and regenerated skin.

PROBLEMS

- Asphyxiated skin
- Dull skin
- Impure skin with imperfections
- Skin in need of regeneration

EFFECTS

- Exfoliation and tissue regeneration
- Purified and oxygenated skin
- Even and radiant skin
- Detoxified skin

Single-dose sachet 4 ml

Product included in the kit and not sold individually

MAIN ACTIVE INGREDIENTS

LACTOBIONIC ACID

Disaccharide formed by the association of gluconic acid, a polyhydroxy acid, and a sugar molecule, galactose. Promotes gentle exfoliation and cell renewal, modulating the keratinization process. Applied to the skin, it tends to produce a thin surface film; in fact, due to the high molecular weight, it is difficult to penetrate the skin compared to the smaller alpha-hydroxy acids. At the same time, this slower and more delicate

absorption makes it more tolerated by sensitive skin. In addition, it has anti-oxidant and soothing properties and has a stimulating effect on collagen production.

GLUCONOLACTONE

Like Lactobionic Acid, it is a polyhydroxy acid. Applied to the skin, it promotes exfoliation, modulating the keratinization process and stimulating skin renewal. From a chemical point of view, it consists of a lactone ring which releases gluconic

acid, responsible for the molecule's activity, due to the hydrolytic action of the skin's moisture. Gluconolactone has a strong long-term hygroscopic and moisturizing power, thanks to the presence of numerous hydroxyl groups. It also has good antioxidant and restoration capabilities of the damaged skin barrier. Unlike the most common chemical exfoliants it is not irritating and does not induce photosensitization

INSTRUCTIONS

See how to use on the kit. For external use only. Do not swallow. Avoid contact with eyes, mucous membranes and non-intact skin. Rinse immediately in case of irritation and stop using the product.
PROFESSIONAL USE.

INGREDIENTS: AQUA (WATER), GLYCERIN, PVP, SUCROSE, GLUCONOLACTONE, LACTOBIONIC ACID, AMMONIUM ACRYLOYLDIMETHYLTAURATE/VP COPOLYMER, CAPRYLYL GLYCOL, 1,2-HEXANEDIOL, TROPOLONE.
