The perfect allies for a complete remodeling and slimming treatment

AROSHA
AESTHETIC SCIENCE

ATTACK

Professional program specifically developed to treat skin blemishes due to advanced cellulite.

For excellent and long-lasting results, combine professional treatment with a targeted home beauty routine.

Promotes the degradation of micro and macro nodules

Promotes the reduction of adipocytes

Counteracts the formation of new fat cells

Promotes the conversion of fat into energy

Improves skin laxity and tone

PROFESSIONAL TREATMENT

A complete and effective program for evident and measurable results from the first treatment

.330 FIBROCEL+

Helps to counteract the skin blemishes due to the more advanced stages of cellulite. Contrasts the “orange peel” appearance, reduces the visibility of subcutaneous nodules, improves skin elasticity and tone.

.307 CELLULITE PLUS

It favors the drainage of liquids, facilitates the dissolution of fats, nourishes and improves skin elasticity.

For an even more effective result, it is recommended to combine the treatment with the use of technologies (pressomassage, infrared, ultrasound plates).

HOME CARE ROUTINE

.515 CELLULITE

It helps improve skin circulation, promotes fat dissolution, nourishes and improves skin elasticity.

.516 CELLUNIGHT

Contrasts the accumulation of fat during the night, facilitates its dissolution and promotes the degradation of fibrous nodules.

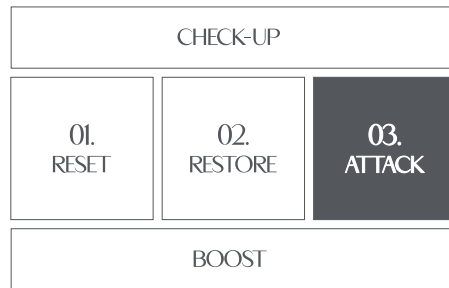

.521 SILHOUETTE PANTS

It dissolves fats, counteracts their accumulation in adipose tissue and promotes the degradation of fibrous nodules.

The Collagenase enzyme intervenes in the breakdown of defective collagen fibers which, on the one hand, compress the fat cells leading to the formation of fibrous nodules and, on the other, exert traction on the skin causing the so-called “orange peel” effect .

The result is a real restructuring of the skin and a consequent smoothing and toning effect.
