

ATTACK / BODY

340 ACTIVE UP

Rewrite your story
A new dimension of youth
and vitality for your body.

AROSHA
AESTHETIC SCIENCE

.340 ACTIVE UP

In the third and final ATTACK phase of the Arosha method, .340 ACTIVE UP is tailored to face skin sagging, body atony, and visibly enhance the appearance of newly formed stretch marks, all of which are blemishes caused by the natural aging process, weight loss, and improper, sedentary lifestyle.

This treatment formulation is powered by the special Architekt Define Technology which combats the effects of gravity by restructuring elastic fibers, stimulating new collagen synthesis, and improving the skin's natural hydration system.

The result? Firmer, toned, and remarkably resilient skin.

TECHNOLOGICAL INNOVATION AND ACTIVES

ARCHITEKT DEFINE TECHNOLOGY

WHAT IS

The Architekt Define Technology combines the work of three active ingredients with different specific functions: Hydroxyprolysilane, Hydagen® Aquaporin, and Actygy™.

As a true architect of skin rejuvenation, this technology acts on the multiple fronts of the skin's structural scaffolding to give it firmness and tone.

HYDROXY- PROLYSILANE

WHAT IS

Hydroxyprolysilane is a technological combination of organic silicon, with a restructuring function of the skin scaffold, and hydroxyproline, which optimizes collagen synthesis.

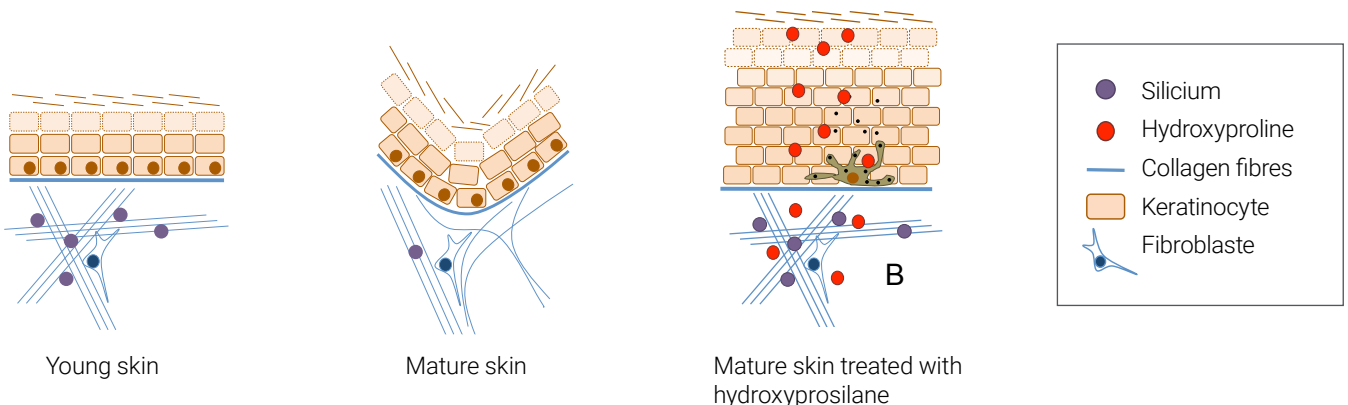

HOW IT WORKS

Silicon plays a crucial role in the skin's composition. By engaging with vital proteins like collagen fibers, elastin, and proteoglycans, it facilitates the optimal arrangement of dermal tissue. Unfortunately, as we age, the natural presence of organic silicon in the skin diminishes, causing it to lose its effectiveness and resulting in a breakdown of the skin's structural integrity. However, when bound to hydroxyproline, silicon stabilizes and retains its ability to promote skin restructuring.

Hydroxyproline, on the other hand, is one of the key amino acids composing collagen, and when bound to Silicon, it leverages its carrier capacity. Given silicon's strong affinity for dermal tissue, it naturally adheres to the skin compartments where Hydroxyproline is present, allowing it to penetrate into the deeper layers of the skin. This increases its bioavailability, enabling it to act more effectively in replacing damaged collagen fibers.

PLUS

1. Replaces damaged elastic fibers.
2. Rebuilds skin tissue architecture.
3. Restores skin firmness.

HYDAGEN® AQUAPORIN

WHAT IS

It is a highly technological active capable of providing both short-term and long-term hydration, while simultaneously reinforcing the barrier function and reducing transepidermal water loss (TEWL).

HOW IT WORKS

Hydagen Aquaporin acts on water channels known as Aquaporins (AQP), which are large proteins encapsulated in cell membranes. These channels function like pores, allowing water to pass rapidly from the outside to the inside of cells and vice versa. The discovery of Aquaporins is relatively recent and earned the Nobel Prize in Chemistry in 2003 for P. Agre and R. Mackinnon.

PLUS

1. Guarantees short- and long-term hydration.
2. Strengthens the skin barrier.
3. Reduces transepidermal water loss (TEWL).

ACTYGIN®

WHAT IS

It's a marine-derived functional obtained through biotechnology from the metabolism of a microorganism, a plankton originating from Bermuda. It tones the body contours and redefines the silhouette.

HOW IT WORKS

It mimics the effect of resistance exercise, increasing the release of adiponectin and promoting mitochondrial activity. The results are significantly more intense when combined with physical activity.

PLUS

1. Toning and firming action.
2. Slimming effect.
3. Redefinition of body contours

HYDROLYZED COLLAGEN

Collagen is a fibrous protein and one of the major components of the dermis. When applied to the skin, it enhances firmness, compactness, and thickness. Hydrolyzed collagen, in particular, is a type of collagen obtained through hydrolysis. This process breaks down its long native chains into smaller fragments, making it easier for penetration and absorption through the skin.

FERMENTOIL

Thanks to the fermentation technology and the use of the microorganism *Pseudozyma Sp.*, known for cleaning waste oils in the ocean, an exceptional blend of fermented oils has been created, including Olive, Argan, Sunflower seed, Korean licorice-Glycyrrhiza uralensis, and Shiunko. Fermented oils, compared to traditional ones, have a superior consistency, offering powerful moisturizing and skin penetration benefits. Additionally, they boast intense antioxidant, protective, and regenerative action, along with anti-irritation and anti-inflammatory properties.

VEGETABLE OILS (ROSEHIP OIL, JOJOBA OIL, SWEET ALMOND OIL, ARGAN OIL)

Thanks to their high composition in essential fatty acids, they have highly moisturising and emollient. They are also rich in phytosterols and antioxidant substances that prevent the skin from ageing and contribute to tissue regeneration. Finally, thanks to their regenerating and elasticising properties, they are ideal for preventing the formation of stretch marks and improve the healing of the skin.

BETAINA

A natural substance extracted from sugar beet (*Beta vulgaris*), to which it owes its name. Due to its solubility and ability to coalesce water molecules, it is an excellent moisturising and humectant ingredient. Its moisturising and humectant action. Its ability to combat cellular ageing processes and free radicals also make it an active ingredient with a strong tissue repairing and protective action.

PROFESSIONAL TREATMENT

ATTACK / BODY

.341 B-TONE

Restructuring, elasticising, nourishing and protective

ACTIVE INGREDIENTS

Sweet Almond Oil, Jojoba Oil, Rosehip Oil, Fermentoil (Olive, Argan, Sunflower Seed, Korean Herb Glycyrrhiza Uralensis and Shiunko), Architekt Define Technology, Hydrolyzed Collagen
nr. 4 - vial 10 ml

.342 REDEFINE MASK

Firming, Toning and Moisturising

ACTIVE INGREDIENTS

Architekt Define Technology, Hydrolyzed collagen
Nr. 2 - disposable sachet 75 ml

 fresh effect

.343 UP&TONE

Firming, Toning and Moisturising

ACTIVE INGREDIENTS

Architekt Define Technology
Nr. 2 packs x 250 ml

Each pack contains n.2 pre-soaked bandages 10cm x 10m in extension (46% Viscose - 54% Polyamide)

TO COMPLETE THE TREATMENT*

.345 TONING PLUS

Restructuring, firming and nourishing

ACTIVE INGREDIENTS

Architekt Define Technology, Shea Butter, Vegetable Oils
Airless 500 ml

*Product not included in the kit

BOOST NOVELTIES

BOOST / BODY

.518 B-TONE

Restructuring, Elasticising, Nourishing and Protective

ACTIVE INGREDIENTS

Sweet Almond Oil, Jojoba Oil, Rosehip Oil, Fermentoil (Olive, Argan, Sunflower Seed, Korean Herb Glycyrrhiza Uralensis and Shiunko), Architekt Define Technology, Hydrolyzed Collagen
100ml bottle

.522 UP&TONE PANTS

Firming, Toning and Moisturising

ACTIVE INGREDIENTS

Architekt Define Technology
Nr. 1 pants + nr. 1 refill + 2 cartene pants

 fresh effect

Products not included in the kit

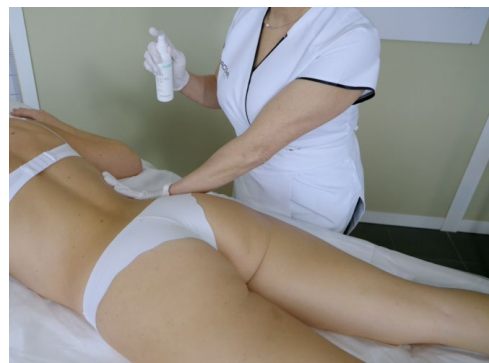

PROFESSIONAL TREATMENT

Watch
tutorial

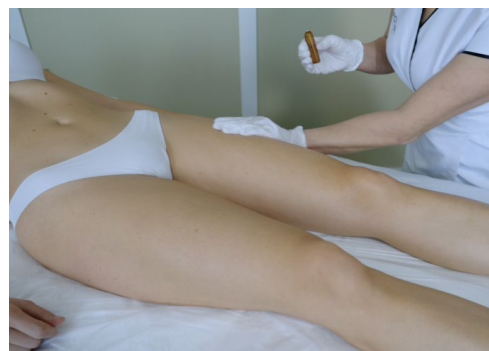

STEP 1 PREPARATION

Mechanical peeling with
AROSHA BRUSH + chemical
peeling with .106 GLYCOLIC
ACID

STEP 2 ACTIVATION

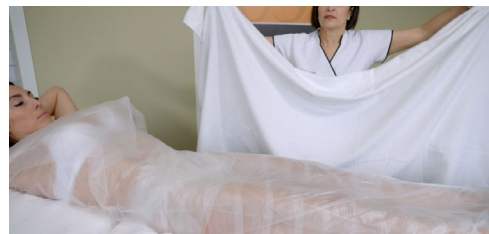

.341 B-TONE

STEP 3 SHOCK ACTION

depending on the specific session
.342 REDEFINE MASK
or
.343 UP&TONE

To enhance the results, use the
specific electrostimulation/ultrasound
equipment or, alternatively, proceed
with the specific exercises of
ACTIVE UP WORKOUT
(in combination only
with .342 REDEFINE MASK)

STEP 4 FINAL MASSAGE

.345 TONING PLUS

STRENGTHS

ARCHITEKT DEFINE TECHNOLOGY

A true architect of skin rejuvenation that restores the firmness and tone of the skin structure

READY TO USE

Inside the kit there are all the products in the quantity necessary to immediately carry out the complete treatment

IMMEDIATE RESULTS

Visible and measurable from the first treatment in the cabin

Optimisation of time: a few fundamental steps to achieve results scientifically proven

**QUICK
TO USE**

A few targeted exercises to intensify the effect of the resistance exercise favored by the products applied, thus maximizing the benefits of the treatment

**ACTIVE UP
WORKOUT**

Electrostimulation/ultrasound maximizes the benefits of the treatment

**COMBINABLE WITH
TECHNOLOGIES**
