

.721 EYE PATCH R³

Pure Biocellulose

Revitalises - Reduces - Repairs

Eye mask in pure biocellulose enriched with a blend of active ingredients to combat wrinkles, dark circles, puffiness, and swelling in the eye contour area. Ectoine and vitamin B3 (PP) protect the skin from aging, while DMAE and caffeine improve tone and elasticity. Aloe vera and hyaluronic acid are known for their hydrating and decongestant properties, while vegan collagen and a marine ferment promote skin renewal. A complete treatment for a visibly fresher and more relaxed look.

PROBLEMS

- Dark circles
- Puffiness
- Periocular wrinkles
- Expression lines

EFFECTS

- Lifting
- Anti-age
- Lightened spots

Sachet with no. 2
eye patches 6 ml

Cod. Art.: ARO502301

MAIN ACTIVE INGREDIENTS

ORGANIC BIOCELLULOSE

Biocellulose is the base of this innovative eye mask, which not only perfectly adapts and adheres to the skin but also has distinctive technological properties: 1. it delivers the active ingredients with which it is infused deep into the skin; 2. it removes impurities from the skin.

ECTOINE

An amino acid derivative belonging to the group of "extremolytes," small molecules that protect plants and extremophile microorganisms from lethal and extreme conditions in their habitats, such as salt lakes, thermal springs, Arctic ice, deep waters, or deserts. Ectoine provides global and powerful protection, shielding the skin from both extrinsic and intrinsic aging factors and cellular damage caused by pollution particles, sunlight (including IR-A and visible light), temperature, and chemical stress. It also improves cellular functions responsible for skin health and beauty. This comprehensive

protection and repair activity lead to visible, long-term preservation and restoration, enhancing skin health.

VITAMIN PP

Also known as Vitamin B3 or Niacinamide, it stimulates lipid production and the formation of collagen and elastin. It has antioxidant properties and protects the skin from free radicals, preventing premature aging and making the skin firmer, smoother, and more elastic. Vitamin B3 also supports the formation of lipids and ceramides essential for the skin's protective barrier. An intact skin barrier ensures less fluid loss and greater resistance to external influences.

ACETYL HEXAPEPTIDE-8. A peptide that inhibits acetylcholine release, reducing muscle contraction and therefore dynamic wrinkles. It blocks the interaction between SNAP-25 and synaptobrevin proteins, preventing nerve signal transmission (acetylcholine) to muscles. This relaxing effect on facial muscles

contributes to smoother, more relaxed skin. Particularly effective on expression lines around the forehead and eyes, regular use improves skin elasticity for a more youthful, toned appearance.

HIGH MOLECULAR WEIGHT HYALURONIC ACID (HMW HA)

Due to its size, it remains on the skin surface, where it primarily forms a film that reduces water evaporation and promotes indirect hydration.

COL-FRAG REMASTERED™.

A biomimetic fragment of human type I collagen produced from wild plants via vertical farming. This sustainable technology provides a biomimetic molecule of a human type I collagen fragment, with the necessary post-translational hydroxylations for full functionality. Col-Frag Remastered™ acts as a building block and enhancer for collagen synthesis, firming dermis and epidermis while preventing senescence. It also provides a lifting effect and enhances skin radiance.

INGREDIENTS: AQUA (WATER), GLYCERIN, ALOE BARBADENSIS (ALOE VERA) LEAF JUICE, PROPYLENE GLYCOL, NIACINAMIDE, PROPANEDIOL, CAFFEINE, ETHOXYDIGLYCOL, ECTOIN, SODIUM HYALURONATE, NICOTIANA BENTHAMIANA HEXAPEPTIDE-40 SH-POLYPEPTIDE-47, ALTEROMONAS FERMENT EXTRACT, DIMETHYLAMINOETHANOL TARTRATE, ACETYL HEXAPEPTIDE-8, PENTYLENE GLYCOL, 1,2-HEXANEDIOL, HYDROXYACETOPHENONE, CAPRYLHYDROXAMIC ACID, SODIUM HYDROXIDE, CAPRYLYL GLYCOL, POTASSIUM SORBATE, SODIUM BENZOATE.

MAIN ACTIVE INGREDIENTS

DMAE (DIMETHYLAMINOETHANOL)

Provides an immediate lifting effect, smoothing wrinkles and counteracting skin sagging. Its antioxidant properties also enhance skin hydration and elasticity.

MARINE FERMENT

Active ingredient obtained from fermenting a new species of *Alteromonas*: *Alteromonas lipotruae*. This microorganism lives symbiotically on the surface of the most venomous Mediterranean jellyfish,

Pelagia noctiluca. Metabolomic analysis of the fermentation confirmed the presence of biomimetic compounds linked to muscle contraction. Specifically, it relaxes expression wrinkles by acting on the three steps of neuromuscular communication: neuritogenesis and neuron migration, synaptic vesicle recycling, and muscle contraction.

CAFFEINE

Ideal for treating areas prone to puffiness

and water retention, such as the eye contour, helping to significantly reduce the appearance of dark circles. It also improves skin elasticity, leaving it smoother and firmer.

ALOE BARBADENSIS EXTRACT (ALOE VERA)

Anti-inflammatory, repairing, soothing, and anti-aging.

INSTRUCTIONS

Each sachet contains two masks. Each mask is between 2 films. Once a mask is removed from the sachet, remove the outer film, apply the mask to the face then remove the second film. Repeat the same procedure with the second mask, applying it to the other eye. Ensure the masks adhere perfectly then leave them on for 20-30 minutes. Remove the mask and gently dab with the palm of the hands to facilitate the absorption of any residual serum.
