### LYMPHATIC SYSTEM

The lymphatic system has the important task to collect waste substances, toxins and excess fluids from the tissue and to help in their elimination.

As the movement of the lymph is generated just from the contraction of the muscles, when we remain stationary for a long time, or in the same position, the feet or legs swell with the consequent stagnation of the liquids and probable appearance of cellulite.

To avoid this situation Arosha has created NIO DRAIN + the professional treatment able to promote an intensive draining action, obtaining positive effects that will benefit the health of the skin.

Discover more in our Beauty Centres.

### RETAIL

The stagnation of liquids is the first step that leads to the formation of cellulite.

How can you avoid this problem? Of course the right habits are a good starting point, as maintaining :

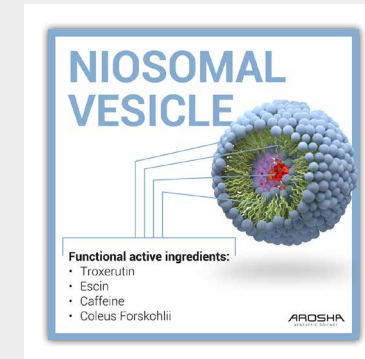

- regular physical activity
- proper nutrition
- correct beauty routine

That's why we created a new intensive draining gel cream! Ultra light, with a comfortable texture and easy to apply. The best solution to act every day against: heavy legs, retention, swelling.

Balance your skin with .501 NIO DRAIN gel cream!

### NIOCONTROL™

Do you know why AROSHA NIO DRAIN professional products are so effective?

Thanks to the innovative NIOCONTROL™ technology, based on Niosomes. This innovative system allows us to:

1. Deliver the active ingredients deeper into the dermis
2. Gradually release the active ingredients present
3. Extend the benefits of the products for several hours, achieving better results

Let's discover more about the new Arosha draining line and give your skin the right balance to reach a perfect shape.
