AROSHA
AESTHETIC SCIENCE

ABOUT US

Arosha is an Italian professional cosmetics brand, specialized in highly effective body and face treatments.

It stands out for its ease of use, the effectiveness of its protocols, and measurable results, thanks to a scientific approach focused on achieving objectives.

Every choice - from research to production, from formulation to packaging - stems from a simple principle: taking care of every detail, of people, and of the environment that hosts us.

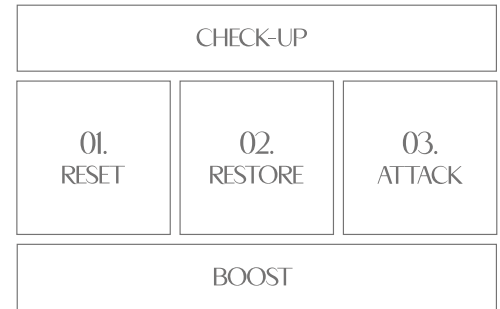

We don't follow trends, but an ethical, controlled production model entirely made in Italy.

WHERE SCIENCE MEETS BEAUTY

AROSHA
AESTHETIC SCIENCE

THE METHOD

A gradual and consistent journey, designed to guide both the client and the professional toward tangible results.

Each phase is identified by a color, and each product by a number, for simple and immediate recognition.

The journey is structured in 5 phases:

THE METHOD AT THE HEART OF SUCCESS

CHECK-UP

An important preparatory step, always performed before treatments. At Arosha Beauty Centers, clients are guided throughout the entire program with a personalized analysis and continuous progress monitoring to ensure their desired results are achieved.

02.

This is the second phase of the method, designed to rebalance, harmonize, and restore the skin's natural physiological conditions. On the face, the goal is to protect, strengthen, and enhance radiance; on the body, to promote the drainage of excess fluids and restore the physiological balance of the tissues.
